Posts and Telecommunications Institute of Technology *Sep 2019 - Present*

CERTIFICATION

AWS Certified Developer – Associate

TOEIC - 855

LANGUAGE

English - Intermediate

EXPERIENCE

Frontend Developer

Bluebottle Digital Vietnam *Apr 2022 - Jul 2024*

Software engineer

CMC Global *Oct 2024 - Nov 2025*

Software Engineer

FPT Software *Jan 2026 - Present*

SKILLS

- Frontend: HTML, CSS, React.js, Next.js, NextAuth, React-query, Tailwindcss, Responsive Design, Web Performance Optimization.
- Backend: Node.js, NestJS, RESTful APIs, gRPC.
- Databases & AI: PostgreSQL (with pgvector), MongoDB, RAG (Retrieval-Augmented Generation), Gemini AI, Vector Embeddings, Semantic Search.
- DevOps, Cloud & Build Tools: AWS, Docker, CI/CD, Jenkins, Git, Vite, Webpack.
- Architecture & Practices: System Design, Agile/Scrum, Client Communication.

PROJECTS

JavaScream

Owner *Feb 2026 - Present*

Description: JavaScream is a technical blogging platform focused on JavaScript, TypeScript, and web platform engineering. It serves as a content hub where in-depth articles on software systems and frontend concepts are published, searchable, and browsable by category and tag.

Technology used:

- Next.js, Tailwind, Supabase (PostgreSQL + PGVector)

Number of members: 1

Main activities and responsibilities:

- Content management — authored and published technical articles with full Markdown support, structured into categories, tags, and series; managed post lifecycle (draft → published → archived)
- Database design — designed and maintained a relational schema covering posts, profiles, categories, tags, series, and post-tag relationships with RLS enabled on all public tables
- Search & discovery — built a filterable archive page supporting full-text search, category filtering, and tag filtering with URL-based query state
- Article reading experience — implemented individual article pages with auto-generated table of contents, author metadata, related articles, and estimated read time
- Data layer — organized all Supabase queries into a dedicated `src/queries/` layer, keeping pages clean and logic reusable
- Content pipeline — transcribed and adapted Vietnamese video content into structured

Internal Tool

Fullstack Developer *Jan 2025 - Present*

Description: An internal web app to manage workers, capacity, and resources within the organization, featuring an AI-powered knowledge assistant, significantly improving information retrieval speed for the team.

Technology used:

- Backend: Express.js, Redis, Bull, Websocket, Joi, PostgreSQL (pgvector), Gemini AI, Vector Embeddings, SSE, ...
- Frontend: Angular, Bootstrap, ...

Number of members: 7-12

Main activities and responsibilities:

- AI Chatbot & RAG Implementation: Engineered an intelligent internal chatbot utilizing a Retrieval-Augmented Generation (RAG) architecture. Generated vector embeddings from internal documents, leveraging pgvector for precise semantic search and Gemini AI for contextual response generation.
- Providing solutions advice to customers.
- Develop new features
- Review code

Kickle App

Backend Developer *Aug 2025 - Nov 2025*

Description: A social app, allow users to manage tournament, and for the assessment of other people's abilities and attitudes.

Technology used:

- Backend: NestJS, Meta API, RabbitMQ, AWS SES, PostgreSQL, Socket.IO, Firebase, ...

Number of members: 3-5

Main activities and responsibilities:

- Initialized, implement authentication, define rules.

- Design database, design architecture
- Review code

Orient Futures International Singapore (OFIS)

Frontend Leader *Jun 2025 - Jan 2026*

Description: (B2B) Financial project to manage client requests.

Technology used:

- React, Javascript/Typescript, Azure/MSAL, Ant, Zustand, Yup, React-query, ...

Number of members: 7-12

Main activities and responsibilities:

- Bootstrapped and configured frontend architectures using Vite/Webpack from scratch, ensuring optimized bundling strategies and faster development servers.
- Set up Gitlab actions, implemented MSAL, and optimized build times.
- Estimate, break tasks
- Review code
- Daily sync-up with client & solution discussion

Mha Intranet

Developer *Oct 2024 - Jun 2025*

Description: Developed a Sharepoint intranet to enhance content management, collaboration and communication. Enable administrators to efficiently create and manage content, configure web parts, and organize and engage with information, improving departmental collaboration.

Technology used:

- React, Javascript/Typescript, SPFx, Pnp/Sp, ...

Number of members: 10 - 20

Main activities and responsibilities:

- Define rules to match sonarque
- Review code
- Daily sync-up with client & solution discussion
- Create webparts & implement sharepoint permission
- Custom sharepoint functions

Management Social Accounts

Leader *Aug 2024 - Oct 2024*

Description: Management social accounts of users and post posts on social medias simultaneously: Facebook, Instagram, Linkedin, Reddit, Youtube, ...

Technology used:

- Frontend: HTML, CSS, Vite.js, React.js, Redux-toolkit, Ant Design, recharts, Google Api, Meta Api, ...
- Backend: Nest.js, MongoDB, Passport.js, AWS SES, Bull, Redis,...

Number of members: 5-7

Main activities and responsibilities:

- Manage team members, source code
- Create rules: eslint, prettier
- Integration 3rd party
- Design database
- Review code
- Evaluated and integrated Meta and Google APIs to ensure reliable, high-performance simultaneous cross-platform posting.

Fandelo One (Bluebottle Digital Vietnam)

Frontend Developer *Nov 2023 - Jul 2024*

Description: Web app to manage all things finance, end-to-end. Track your pipeline and sync your existing finance system. Green-light bookings, sign contracts, ...

Technology used:

- HTML, CSS, Tailwindcss, NextAuth, Nextjs, Turbo, React-query, Hellosign, Xero, Socket.IO ...
- Springboot, MongoDB

Number of members: 10 - 20

Main activities and responsibilities:

- Initialized project base, implemented authentication, and defined system rules, ...
- Automated Deployments: Orchestrated robust CI/CD pipelines with Jenkins, ensuring zero-downtime deployments and consistent code delivery across environments.
- Enhanced Developer Experience (DX): Integrated Turbo to streamline the local development workflow, utilizing aggressive caching to eliminate redundant tasks and boost team productivity.
- Review code, manage source
- Discuss with BA, client & develop team to analyze requirements
- Investigated and implemented secure third-party integrations (Hellosign, Xero) and real-time data sync using Socket.IO to enhance financial workflow efficiency.
- Create backend api

Fandelo Cms (Bluebottle Digital Vietnam)

Frontend Developer *Jan 2023 - Jul 2024*

Description: Web app to manage contents and users for Fandelo native app

Technology used:

- HTML, CSS, Tailwindcss, Nextjs, React-query, Ant Design, ...

Number of members: 5 - 10

Main activities and responsibilities:

- Developed responsive UI components, architected frontend layouts, and managed styling configurations.
- Refactor, update project base
- Integration with back-end, 3rd party
- Optimized dashboard load times and data fetching strategies by leveraging Next.js capabilities and React-query for efficient state management.

Believe Tasmanian (Bluebottle Digital Vietnam)

Frontend Developer *Jul 2023 - Sep 2023*

Description: This is the landing page of an organization that inspires and supports young men and women to play the sport of Tassie jumper, combined with selling athletic apparel in Hobart, TAS, Tasmania, Australia.

Technology used:

- Nextjs, HTML, CSS, Tailwindcss, Shopify Api ...

Number of members: 10-15

Main activities and responsibilities:

- Initialized, create base components, rules and develop.
- Integrated Shopify API and utilized Next.js rendering strategies to deliver a high-performing, SEO-friendly e-commerce experience.

Fandelo landing page (Bluebottle Digital Vietnam)

Frontend Developer *Feb 2023 - Apr 2024*

Description: Modern animated UI landing page to reboot Fandelo Cms into Fandelo One

Technology used:

- Nextjs, HTML, CSS, Tailwindcss, Frame motion, ...

Number of members: 2-5

Main activities and responsibilities:

- Implemented Framer Motion animations while strictly monitoring Web Vitals to ensure a fluid, highly interactive UI without compromising page load speed
- SEO optimization.

Prism admin (Bluebottle Digital Vietnam)

Frontend Developer *Apr 2022 - Jan 2023*

Description: Manage and connect organizations and individuals providing and using services for horse racing

Technology used:

- Angular, Hellosign, Xero, bootstrap, Redux, ...

Number of members: 10 - 20

Main activities and responsibilities:

- Integration with back-end, 3rd party
- Research the latest technologies to use for the project, solutions that optimize performance and user experience.

Prism Trainer Website (Bluebottle Digital Vietnam)

Developer *Apr 2022 - Jan 2023*

Description: Personal websites for Prism users

Technology used:

- HTML, CSS, Reactjs, Nextjs, Ant design, Bootstrap, Tailwindcss, Charka ui, ...

Number of members: 10 - 20

Main activities and responsibilities:

- Developed responsive UI components, architected frontend layouts, and managed styling configurations.
- Research the latest technologies to use for the project, solutions that optimize performance and user experience.
- SEO optimization

Ui & utility typescript lib

owner *Present*

React library based on Tailwindcss, Shadcn, built by Vite & Rollup.
